

ELECTRIC PROTECH

LONG LASTING PROTECTION

Product Information:

- Super Hydrophobic
- Powerful Electronic Insulation
- Long Term Protection
- AC and DC Adaptive
- High Voltage Tolerance
- Extreme Temperature Tolerance
+250 to -80 Degrees Celsius
- Restores Insulation Resistance
- Enhances Energy Efficiency to 100%
in Harsh Conditions

Properties:

- Forms a Waterproof and Water
repelling Coating
- Works on Moving Parts and Machinery.
- Can be applied on Wet Surfaces.
- Dielectric Strength: 256 kV/cm
- Retains Electrical Conductivity of
the Parts in Moisture.
- Creates an Insulating Layer, which
prevents Leakage of the Surface Current.
- Penetrates the Rust, Preventing further
oxidization retaining Elasticity

Ingredients:

Silica, Hydro Carbons, Purified Mineral Oil,
Propellant, Nano Formulation

Precautions:

- NOT FOR HUMAN CONSUMPTION
- CONTACT DR IF INGESTED
- USE CORRECT PPE WHEN APPLYING

Directions for Use:

- Shake Well Before Use
- Spray at a Distance of 20 - 30cm
- Remove Excess Residue after 10 - 15 minutes
- Consumption Equals 50ml per Square

Where to Use:

- Electrical Cables
- Electrical Contacts and all Components
- Electrical Circuit Boards & Breakers, Fuses
- Cellphones, Laptops, TV Monitors, Speakers
Lighting, Cameras, Adaptors
- Measuring Devices, Sensors
- Telecommunication Aerials
- Electronic Equipment of Any Kind

ONE APPLICATION CAN LAST UP TO ONE YEAR

PROTECTS AGAINST EXTREME CONDITIONS
