

## MOTORCYCLE

### LONG LASTING PROTECTION

#### Product Information:

- Water and Moisture Displacement
- Effective Lubrication for Moving Parts
- Creates impenetrable Protective Shield
- Remains flexible and Reduces friction
- Nano Particles Penetrate deep into the pores and micro cavities, filling them and repelling all Moisture and Dust particles.
- Remarkably prolonging the Lifespan of treated Components
- Effectively Prevents Corrosion
- Can effectively Withstand 500 volts
- AC and DC Adaptive
- Powerful Electronic Insulation
- Penetrates and Releases Rusted Seized Nuts, Bolts and Locks
- Super lubricant

#### Ingredients:

Silica, Hydro Carbons, Purified Mineral Oil, Propellent, Nano Formulation

#### Precautions:

- NOT FOR HUMAN CONSUMPTION
- CONTACT DR IF INGESTED
- USE CORRECT PPE WHEN APPLYING

#### Directions for use:

- Shake well before use
- Spray at a distance of 20-30cm
- Remove excess Residue after 10-15 minutes
- Consumption equals 50ml per Square
- Retains properties at -80 to 140 degrees Celsius
- Can be applied to wet surfaces

#### Safe for Use on:

Metal, Plastic, Rubber, Glass, Ceramics,  
Lacquer and Paint  
Silicone free

#### Where to use:

- Moving Components
- All Electronics
- Transmissions
- Bolts and Nuts, Locks
- Battery Terminals
- Corroded Metals

ONE APPLICATION CAN LAST UP TO ONE YEAR

PROTECTS AGAINST EXTREME CONDITIONS
